Time: 10:45 A.M.

---

Credit Valley Conservation advises that the upper part of the watershed (Orangeville, Caledon) received 25-30 mm of rain during Saturday, June 17, 2017. Additional amounts of rain in the range of 5-15 mm are expected today. Localized areas may see higher amounts due to the risk of thunderstorms today afternoon-evening.

While flooding is not anticipated along the Credit River and downstream areas of its major tributaries, heavy downpours associated with thunderstorm could results in flush flooding in urban and headwater areas. All watercourses in the affected areas will experience higher water levels. As a result, local streams and rivers will become dangerous, especially in the vicinity of culverts, bridges and dams. Children should be warned to stay away from all watercourses.

CVC will continue to closely monitor weather and water levels in the watershed. The Water Safety Statement will be in effect through Tuesday, June 20, 2017 or until further notice.

For more information on this Water Safety Statement, contact CVC during office hours at 905- 670-1615. To report a flood afterhours, please call 1-800-215-8505.
